CARRER OBJECTIVE:

As an ambitious Front End Web Developer, my mission is to position myself as a coveted expert, consistently delivering exceptional web solutions. I actively seek diverse and challenging projects to propel the boundaries of web development, honing my skills and embracing cutting-edge technologies for continuous growth and mastery.

SKILLS:

Expertise: HTML5, CSS3, Tailwind CSS, Daisy UI, Bootstrap, Javascript, React.js, React Router, ES6.
Comfortable: Firebase Authentication, Express.js, Mongodb, Rest Api, Devtool & Debugging.
Familiar: Node, JWT, Axios-interceptor, Tanstack-query, Stripe etc.
Tools: VS Code, Git & GitHub, Vercel, Surge, Figma, Chrome Devtools.
Soft Skill: Hard working, Flexibility, Teamwork, Responsibility.

PROJECTS:

- **WinWave (Contest Creation Platform Website)**   **Duration – 8 days**

Empowering users with a revolutionary online hub for dynamic contests, fostering creativity, innovation, and talent recognition.
Features:

  - o **Robust User Authentication:** Seamlessly register and log in with email/password or Google Sign-in, ensuring secure access and personalized experiences for users of diverse roles.
  - o **Visually Stunning Contest Showcase:** Elevate user engagement with a captivating design, showcasing a visually appealing search bar and dynamic content that highlights popular contests and contest creators.
  - o **Efficient Role Management:** Empower administrators with a comprehensive dashboard, enabling streamlined control over user roles, contest approval, and management for a seamless and efficient platform operation.

Technology: Html, CSS, Tailwind, JavaScript, React, Firebase, MongoDb, Node.js.
Dynamic-Link || **Client-Side** ||**Server-Side**

- **EatsHub (Restaurent Management Website)**   **Duration – 6 days**

An innovative Restaurant Mastery Hub, empowering seamless ordering, dynamic blogging, and interactive user experiences.
Features:

  - o **User-Centric Interaction:** Personalize experiences with tailored profiles, showcasing added, ordered, and top-selling food items for a dynamic and engaging journey.
  - o **Secure and Seamless Transactions:** Fortify user interactions through JWT-secured routes, ensuring confidential data protection and smooth, authenticated transitions between login, order, and profile activities.
  - o **Immersive Content Exploration:** Elevate user exploration with an enticing homepage, featuring a vibrant banner, top-selling foods, and engaging blog content, fostering an immersive and delightful website experience.

Technology: Html, CSS, Tailwind, JavaScript, React, Firebase, MongoDb, Node.js.
Dynamic-Link || **Client-Side** ||**Server-Side**

- **VibeHub (Brand Shop Retail and E-commerce)**   **Duration – 4 days**

Brand Shop Retail and E-Commerce, An innovative, secure online marketplace for diverse brand products.
Features:

  - o **Intuitive User Experience:** Experience a seamless and visually captivating interface, ensuring effortless navigation and a user-friendly journey through the diverse shopping and brand-centric sections.
  - o **Secure Brand-Centric Shopping:** Enjoy a curated selection of premier brands across categories, providing users with a trustworthy and secure environment for exploring and purchasing high-quality products.
  - o **Versatile Authentication Options:** Elevate security with versatile user authentication, enabling login via email/password or popular alternatives like Facebook, GitHub, Google for a tailored and secure experience.

Technology: Html, CSS, Tailwind, JavaScript, React, Firebase, MongoDb, Node.js.
